## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to an endocrine cell microdisk comprising a discoid microporous encapsulated endocrine cell, classified in class 435, subclass 174.
- II. Claims 9-10, drawn to a flattened macrochamber with one or more surface concavities, classified in class 435, subclass 283.1.
- III. Claims 11-16, drawn to an endocrine cell microdisk comprising a microporous membrane having first and second opposed faces joined together at the periphery thereof and forming an extended flattened structure of lateral extent substantially greater than the maximum thickness between the surfaces and containing endocrine cellular material, classified in class 435, subclass 174.

The inventions are distinct, each from the other because of the following reasons:

The Inventions of Groups I-III represent separate and distinct products comprising materially distinct entities with different structures. For example, the invention of Group I comprises encapsulated endocrine cells which may produce insulin, while the invention of Group II comprises endocrine cellular material which can include any macromolecule of endocrine origin including DNA, RNA, or proteins and further includes a plurality of tabs distinct from that

Art Unit: 1642

claimed in the invention of Group 1. Furthermore, the invention of Group II is materially distinct from the inventions claimed in Groups I and III in that Group II is drawn to a flattened macrochamber.

Because these inventions are distinct for the reasons given above and the search required for one group is not required for another group, restriction for examination purposes as indicated is proper. Furthermore, because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
